ADAM HAFEZ HALAIKA

Software Engineer | Digital Learning Specialist | Technical Trainer | IT Project Coordinator

Hebron, Palestine | +972 56 905 2996 | adamhalaik@gmail.com | LinkedIn: https://www.linkedin.com/in/adam-halaika | GitHub/Portfolio: https://github.com/Adamhalaika1

PROFESSIONAL PROFILE

Software Engineer and digital learning specialist with experience across software development, training program design, e-learning content development, technical facilitation, project coordination, hackathon evaluation, and tender/RFP proposal preparation. Currently contributing to technology, digital transformation, and capacity-building programs within the Ministry of Telecommunications and Digital Economy in Palestine, with strong exposure to public-sector initiatives, youth empowerment programs, and cross-institutional coordination.

Experienced in developing and delivering technical training programs, transforming complex technical topics into clear learning objectives, structured training materials, practical activities, assessments, and implementation reports. Skilled in coordinating with trainers, technical teams, stakeholders, and institutional partners to ensure effective program delivery and measurable learning outcomes.

In addition to institutional work, has hands-on experience working on freelance platforms and independent software projects, including client communication, requirements analysis, solution development, technical documentation, and delivery of web-based solutions. Combines practical knowledge in .NET, APIs, databases, Python, AI fundamentals, and web technologies with strong communication, documentation, stakeholder management, proposal writing, and program implementation capabilities.

Able to contribute effectively to roles in software engineering, digital learning, technical training, IT project coordination, digital transformation, content development, innovation programs, and technology-based capacity-building initiatives.

CAREER FOCUS

Software Engineering | Digital Learning | Technical Training | IT Project Coordination | Digital Transformation | Content Development | Innovation & Entrepreneurship Programs.

KEY ACHIEVEMENTS

- Contributed to the design and delivery of technical and digital skills training programs for diverse audiences, including government employees, students, youth groups, and community-based participants.
- Supported digital transformation and capacity-building initiatives through training coordination, content development, stakeholder engagement, documentation, and reporting.
- Evaluated technology, innovation, and startup-oriented projects during hackathons and youth programs, assessing feasibility, impact, presentation quality, and implementation readiness.
- Prepared and supported technical proposal and tender/RFP documentation, including methodologies, work plans, compliance requirements, and coordination with technical and administrative teams.
- Delivered practical training in AI tools, Python programming for beginners, digital skills, Microsoft Office / ICDL-related skills, and technology awareness.

CORE COMPETENCIES

Digital Learning & Content Development	Training needs analysis, learning paths, course outlines, content writing, instructional materials, assessments, LMS content organization, and learner engagement.
Training & Facilitation	Technical training, AI fundamentals, programming for beginners, digital skills, workshops, remote/in-person delivery, participant evaluation, and training reports.
Software Engineering	ASP.NET MVC/Core, C#, Entity Framework, REST APIs, SQL Server, MySQL, HTML, CSS, JavaScript, Python, Git, Docker basics, and web development.
Programming Adaptability	Able to quickly learn and work with different programming languages, frameworks, tools, and technical environments based on project requirements
Project & Program Coordination	Work plans, implementation follow-up, stakeholder coordination, documentation, KPI tracking, activity reporting, quality assurance, and team coordination.
Innovation & Entrepreneurship	Hackathon evaluation, startup project assessment, mentoring, feasibility review, presentation evaluation, and youth technology programs.
Tenders & Proposals	RFP review, technical proposals, methodologies, administrative files, financial coordination, compliance checklists, and submission preparation.
Freelance Project Delivery	Client communication, requirements analysis, software solution development, documentation, delivery follow-up, and client-focused implementation.

PROFESSIONAL EXPERIENCE

Software Engineer / Digital Transformation & Training Programs | **Ministry of Telecommunications and Digital Economy** | **Palestine | 2022 – Present**

- Support digital transformation and technology capacity-building initiatives by combining software engineering, training coordination, and institutional stakeholder engagement.
- Design, deliver, and support technical training programs in Artificial Intelligence, programming fundamentals, digital skills, and digital transformation, including objectives, session plans, activities, assessments, and supporting materials.
- Coordinate in-person, remote, and hybrid training activities, following up on implementation quality, participant engagement, feedback, outputs, documentation, and reporting requirements.
- Contribute to the development and quality review of training content, workshop materials, learning resources, activity documentation, and implementation reports.
- Evaluate hackathon and innovation/startup projects for university and school students, assessing technical feasibility, innovation value, user relevance, implementation quality, and presentation readiness.
- Coordinate with trainers, consultants, ministries, educational institutions, and technical teams to align program outputs with institutional priorities and target-group needs.
- Prepare and support tender/RFP documentation, including requirements analysis, technical proposals, methodologies, work plans, administrative files, and coordination with technical and management teams.

Full-Stack Developer | **Freelance & Self-Learning Projects** | Remote | Dec 2022 – Present

- Designed and developed web-based software solutions through freelance and independent projects, focusing on clean architecture, maintainable code, practical functionality, and user-friendly interfaces.
- Built and enhanced application components across frontend, backend, database, and API layers, with the ability to adapt quickly to different programming languages, frameworks, and technology stacks based on project requirements.
- Developed and integrated RESTful APIs to support secure data exchange, third-party integrations, and reliable communication between application services.
- Implemented core application features such as authentication, authorization, user access control, data management, and secure interaction between system components.
- Managed relational databases, including database design, queries, schema updates, stored procedures, and performance-oriented data handling.
- Worked directly with clients and stakeholders to understand requirements, analyze business needs, define technical tasks, and deliver practical software solutions aligned with project objectives.
- Strengthened technical capabilities through continuous self-learning, hands-on implementation, online platforms, documentation, and applied project-based development.
- Demonstrated strong ability to learn new tools, programming languages, and development environments independently and apply them effectively in real-world projects.

SELECTED TRAINING, LEARNING & INNOVATION EXPERIENCE

- Delivered and supported training programs in Artificial Intelligence tools, Python programming for beginners, digital skills, digital transformation, digital media, technology awareness, and Microsoft Office / ICDL-related skills.
- Trained diverse groups, including government employees, school students, university students, youth groups, and community-based participants, while adapting content to different learning levels and program objectives.
- Developed training materials, presentations, practical exercises, learner activities, assessments, attendance records, feedback tools, and follow-up documentation for technical and capacity-building programs.
- Supported learning initiatives in coordination with ministries, educational institutions, youth clubs, trainers, and partner organizations across in-person, remote, and blended delivery formats.
- Supervised training implementation through attendance follow-up, learner engagement monitoring, output review, trainer coordination, feedback collection, documentation, and reporting.
- Participated in technology camps, youth innovation activities, Pictoblox-related programs, school-based technology initiatives, and hackathon evaluation in partnership with public and educational institutions.
- Evaluated startup and technology-based projects during hackathons, focusing on idea clarity, technical feasibility, presentation quality, problem-solution fit, implementation potential, and social impact.

TECHNICAL SKILLS

- **Programming & Development:** C#, Python, Java, C++, JavaScript, object-oriented programming, problem solving, code debugging, software development fundamentals, and ability to adapt quickly to new programming languages and frameworks.
- **Web & Backend:** Web application development, backend development, RESTful APIs, API integration, authentication and authorization, frontend development basics, responsive web interfaces, and application maintenance.

- **Databases & Data Management:** SQL Server, MySQL, relational database design, queries, stored procedures, schema updates, data handling, database optimization basics, and reporting support.
- **AI & Data:** AI fundamentals, NLP basics, TensorFlow basics, Pandas, NumPy, data cleaning, data mining, basic data analysis, and practical use of AI tools for productivity, content development, and learning support.
- **Tools & Collaboration:** Git, GitHub/GitLab, Docker basics, Microsoft Office, Microsoft 365, Microsoft Teams, Slack, Google Workspace, Zoom, Google Meet, Trello, basic Jira, and digital collaboration tools.
- **Digital Learning Tools:** E-learning content organization, LMS content management, online workshop delivery, assessment design, learner engagement tools, training reports, presentation design, and digital learning documentation.
- **Documentation & Reporting:** Technical documentation, training documentation, user guides, progress reports, activity reports, meeting notes, proposal documentation, and implementation follow-up reports.
- **Technical Adaptability:** Strong ability to learn and work with new programming languages, platforms, frameworks, and digital tools based on project requirements, organizational needs, and emerging technology trends.

EDUCATION

- **Bachelor of Computer Engineering** | **Palestine Polytechnic University** | Hebron, Palestine
- **Coursework in Computer Science** | University of Bristol | Bristol, United Kingdom
  Completed selected postgraduate-level credit hours toward a Master's program in Computer Science.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Training of Trainers (TOT) | National Institute for Educational Training (NIET) | 2025
- Digital Skills Toolkit Course | International Telecommunication Union (ITU)
- Professional Project Management | 40 hours | 2024
- ASP.NET MVC and Core Advanced | 40 hours | 2024
- Digital Media | 30-hour training program | 2024
- Business English | 30-hour training program | 2023
- Digital Marketing | 30 hours | 2023
- Pictoblox / Scientific Technology Camp Participation | 2023–2024
- CCNA Course | 2022
- Cisco Introduction to Cybersecurity | Cisco Networking Academy | 2021
- Frontend Web Development | Microsoft Course | 2021
