Islam Warasnah

Computer Engineer | Software Engineering | GIS & AI Solutions

Al-Aroub, Hebron, Palestine | +972 562111497 | islamwarasnahh@gmail.com | linkedin.com/in/islam-warasna-8438213a3

PROFESSIONAL SUMMARY

Computer Engineer with practical experience in web application development, GIS-based systems, database-driven solutions, API integration, and AI-enabled digital services. Experienced in supporting government digital transformation projects, including national addressing, logistics tracking, e-government interoperability, and secure data collection platforms. Strong background in SQL, MongoDB, geospatial data visualization, data processing, technical support, and research assistance. Currently pursuing a Master's degree in Artificial Intelligence.

CORE COMPETENCIES

Web Application Development | Software Engineering | GIS-Based Systems | Geospatial Data Visualization | Artificial Intelligence Applications | API Integration | SQL | MongoDB | Data Processing | E-Government Platforms | Digital Transformation | System Analysis | Technical Documentation | Research Support | Project Coordination | Problem Solving

TECHNICAL SKILLS

Software & Web Development: Web applications, backend services, system maintenance, user-focused digital platforms.

Databases & Data: SQL, MongoDB, data processing, database harmonization, records systems, data-driven applications.

GIS & Mapping: GIS-based solutions, geospatial data visualization, national addressing systems, map-enabled services.

AI & Integration: Artificial intelligence applications, AI model integration concepts, API integration, automation support.

Professional Tools: Microsoft Office, technical documentation, presentations, research support, project planning.

PROFESSIONAL EXPERIENCE

Computer Engineer — 2022 - Present

Ministry of Telecommunications and Digital Economy | Palestine

- Develop and maintain web-based applications that support government services and digital economy initiatives.
- Implement GIS-based solutions for national digital platforms, including geospatial data processing and visualization.
- Work with SQL and MongoDB databases to support structured data storage, retrieval, and system functionality.
- Support AI-based solutions by integrating intelligent features and data-driven workflows into digital applications.
- Contribute to API integration and interoperability between platforms to improve information exchange and service delivery.

Teaching and Research Assistant — 2021 - 2022

Palestine Polytechnic University | Hebron, Palestine

- Assisted in programming courses by supporting lectures, labs, student exercises, and technical discussions.
- Supported research activities, documentation, and data preparation related to computer engineering topics.
- Helped students troubleshoot programming and technical lab issues while improving their practical skills.

KEY PROJECTS

Postal Code | palcode.ps/

Governmental GIS and national addressing platform that provides a unique Palestinian postal code for each building and supports standardized digital referencing.

Cainiao Parcels Tracker | express.palpost.ps/

Shipment tracking system integrated with the Cainiao logistics platform through APIs to centralize parcel status updates and improve

tracking visibility.

Zinnar Integration Framework | zinnar.gov.ps/

National e-government interoperability platform supporting governmental data standards, ontology modeling, records systems, and database harmonization.

Employees Form | jorsg.mtde.gov.ps/

Secure online form for employees in southern provinces, supporting centralized data collection, needs assessment, planning, and resource management.

EDUCATION

Master's Degree in Artificial Intelligence, Palestine Polytechnic University | 2021 - Present | Expected Graduation: 2026

Bachelor of Computer Engineering, Palestine Polytechnic University | 2016 - 2021

ADDITIONAL SKILLS

Project Planning | Time Management | Presentation Skills | Stress Management | Technical Support | Data Processing | Communication | Team Collaboration | Microsoft Office
